TWELFTH EDITION

A geographical description of the most traveled highways in the State of Maine with sectional maps, mileages, notes of interest, and an index of recommended stopping places conveniently arranged in alphabetical order by towns.

The reader will notice that we have suggested many alternate routes and side trips to points of interest. Please note that the term "side trip" is used to designate an excursion from the main highway that originates and terminates at the same point, while an "alternate route" is one that terminates at some point farther along on the main route.

The GRAND TOUR of the STATE OF MAINE

(1256 Miles)

This tour has been arranged for the motorist who really wants to see Maine—her miles of rugged sea coast, her thousands of lakes and streams, her hundreds of hills and mountains. It will take you through several of her populous cities, through scores of her peaceful villages, and through tremendous areas of her primeval forests. It will take you through (or near) all of her world-famous recreational areas. It will take you through some of the best hunting and fishing country in the United States, and it will open up to you an entirely new world of scenic splendors. In fact, it will show you Maine—every phase of its great recreational, industrial, and agricultural life can be enjoyed on this Grand Tour.

At least a week should be set aside for the trip, preferably two. Bring your fishing tackle, your golf sticks, your hiking shoes, and your camera. A light overcoat or heavy sweater will come in handy, for, even during August, you will find the night air cool and bracing.

If, perchance your time is limited, we suggest that you study this Tour on the State Highway Map. You will notice that it takes the form of a "loop" through the State. There are several points where "cut-offs" can be made to shorten up the trip, but we recommend this procedure only in the case of direst necessity, for to shorten the Tour would be to shorten your enjoyment of a visit to the State of Maine.

So, we start at Kittery, the first town in Maine on U. S. Highway No. 1, and proceed into Maine as follows:--

ROUTE 1, KITTERY TO FORT KENT

(Via Portland, Bangor, Calais, Houlton and Presque Isle), 561 Miles

This part of the Grand Tour has been described in detail elsewhere in the book. Suffice it to say, however, that U. S. Highway No. 1 is a "trunk line". You will miss much of Maine's natural beauty if you do not take advantage of some, or all, of the many side trips and alternate routes described in the text matter.

ROUTE 11, FORT KENT TO MEDWAY, 134 MILES

This "second leg" of the Grand Tour takes you through the heart of Aroostook County's famous hunting and fishing area,--unexcelled for its wild-life interest and its scenic beauty.

ROUTE 157, MEDWAY TO MILLINOCKET, 13 MILES

Watch carefully for that sharp turn in Medway at the route junction. If you miss it, you'll be headed back towards civilization. In Millinocket, fill your tank with gas, get your permit to use the Great Northern Paper Company's Private Road (at their office), and get set for the most thrilling part of this tour.

PRIVATE ROAD, MILLINOCKET TO GREENVILLE, 90 MILES

From Millinocket, the road proceeds in a northwesterly direction into Baxter State Park, past the foot of mighty Mt. Katahdin, along Sourdnehunk Stream, to the famous Ripogenous Dam at the foot of Chesuncook Lake. Your road crosses the dam, and is open only by special permit from The Great Northern Paper Company. (Permits may be obtained at either Millinocket or Greenville, or by mail from the main office in Bangor.) At Lily Bay, you get your first glimpse of Moosehead Lake, and so, back to civilization at Greenville.

ROUTE 15, GREENVILLE TO ROCKWOOD, 20 MILES

A beautiful ride along the westerly shore of Moosehead, the largest body of fresh water, entirely within the boundaries of one State, on the North American continent, --to Rockwood where a magnificent view of Kineo Mountain awaits you.

ROUTE 195, ROCKWOOD TO JACKMAN, 33 MILES

Another thrilling ride through the "wild lands" of Maine. Don't be surprised if you see a deer or two, or a bear. This is big game country, but there is nothing to fear. Our wildlife is much more afraid of two-legged animals than we are of them.

ROUTE 201, JACKMAN TO NO. ANSON, 68 MILES

Here, alas, we turn south towards civilization, although we still have before us much of interest and many of Maine's beauty spots. This is a part of the Arnold Highway, described elsewhere in the book.

ROUTE 116, NORTH ANSON TO RANGELEY, 64 MILES

For a few miles, we turn back into the woods of western Maine and follow the trail of Benedict Arnold on his famous march to Quebec, up through the Dead River section to Flagstaff and Stratton, and so on to Rangeley, one of America's most famous recreational areas. Here, we find beautiful Rangeley Lake, Mooselookmeguntic, Kennebecago, and others without number.

ROUTE 4, RANGELEY TO FARMINGTON, 44 MILES

Southerly again, the Tour takes us down through Franklin County's fertile farm lands, up over her rock-ribbed ridges where every ascent opens up new vistas and every turn in the road affords a new thrill for the camera enthusiast.

ROUTE 27, FARMINGTON TO AUGUSTA, 37 MILES

More beautiful country-side and a trip through the famous Belgrade Lakes Region awaits you on this part of our Tour on your way to the State Capitol at Augusta. Be sure to visit old Fort Western and the splendid wild-life museum at the State House.

ROUTE 202, AUGUSTA TO AUBURN, 32 MILES

A short ride through the Kennebec Lakes Region to the important industrial center of Lewiston and across the power-producing Androscoggin River to its twin city of Auburn.

ROUTE 121, AUBURN TO WELCHVILLE, 14 MILES

Another of Maine's well-known "by-ways" through rolling farm country to the route junction at Welchville. Just a few miles south of this junction lies one of the world's most famous watering places, Poland Spring,--an interesting side trip if you have the time.

ROUTE 26, WELCHVILLE TO BETHEL, 33 MILES

Our Tour now takes us through a countryside of rolling hills, deep valleys and breath taking views that is unique in Maine. The Oxford Hills seem to be almost a part of another world. In fact, if you are fortunate enough to arrive at this part of your journey during the late afternoon or early evening, we are sure that you will feel yourself bathed in that unworldly serenity that makes you want to say "Peace on Earth, Good Will Towards Men." Bethel, in the heart of this enchanted land, is an ideal place to spend the last night of your Grand Tour. If you do, be sure to get up early next morning to see the color effects of the rising sun on the surrounding hills.

ROUTE 35, BETHEL TO KENNEBUNK, 88 MILES

As the miles click off, almost at the end of our Tour, we leave the Oxford Hills for the beauties of the Sebago Lake-Long Lake Region. And so, down through the farm lands of York County (rich in historical background) to the junction of Route 1 at Kennebunk.

ROUTE 1, KENNEBUNK TO KITTERY, 25 MILES

Someone has said that "all good things must end," but this is not the end for we have come right back to the beginning again. If you have enjoyed this Tour with us, stop for a minute at our Branch Office at York Corner. We'll be mighty glad to have you tell us all about it as we know you'll be telling all your friends about your **GRAND TOUR OF THE STATE OF MAINE.**

THE OLDE GRIST MILL

Established in 1749

KENNEBUNKPORT, MAINE

An historic and picturesque old mill, built by and continuously since owned by the Perkins family, and with the exception of minor repairs and the addition of cupola, is the same as when natives of the "port" sought refuge there from the Indians.

Inside this quaint old structure one finds much of fascinating interest . . . wide floor boards of Colonial days hand hewn beams of ceiling supported by ship's knees, wooden inside blinds, true to style of 1740's, old scales, hopper, endless chain grist elevator, as first installed 197 years ago. Also a lovely old map of northeastern coastline as in 1821, with changes and corrections noted by Perkins millers thru the years.

TODAY, the Olde Grist Mill offers its Colonial atmosphere as a fitting place to serve delicious johnny cake and other old fashioned dishes that well express New England traditions and Maine hospitality.

MAINE CLIMATE MOST HEALTHFUL IN NATION

The U. S. Department of Agriculture, Weather Bureau annual meteorological summary says "Maine has the most healthful climate in the United States and equals any in the world, not only in the summer but also, contrary to popular belief, in the winter.

"Sunshine averages close to 60 per cent for the year and monthly averages vary little during the changes of seasons. Frequently the winter has more sunshiny days than the summer.

"It is a fact that southern Maine has more actual hours of sunshine during the summer months of June, July, August and September than the famous winter resorts of Florida, Georgia, Texas and California have during the winter months of November, December, January and February.

"Vitamin 'D' has been recognized as being very necessary to invalids or convalescent patients. Maine's sunshine and large number of crystal clear days assure residents of large quantities of vitamin 'D' and ultra-violet rays to insure good health."

RELIEF FROM HAY FEVER

Maine is rapidly becoming known as a mecca for those
suffering from hay fever.

Broadly speaking, places in the forested regions offer
great relief and in many cases entire immunity is had,
particularly in northern Oxford County and in the Range-
ley region and the wooded country around Moosehead
Lake. Probably anywhere up in the "Big Woods" region
of Maine where grasses and pollen bearing weeds are not
found can be confidently recommended.

Along the coast where the growth is principally conifer-
ous, Monhegan Island, Newagen, Squirrel Island, Mount
Desert Island, Petit Manan and Eastport are recom-
mended.

Welcome to Maine

We, of the Maine State Police, welcome you to "Maine, the Land of Remembered Vacations."

It is our wholehearted wish that you will have a most pleasant visit in our state. We hereby pledge our best efforts to help you do so.

Maine has taken every precaution possible to make her highways safe so that you may return home safe and sound. In turn, we sincerely hope that you will assist us by observing the laws and regulations that were made to protect you and your fellow motorists.

Maine State Police officers never use their authority promiscuously, but only with the true desire to assist motorists in driving safely. You will not be warned or arrested unless you are doing something that not only jeopardizes your own safety but that of others. Our easily distinguished cars are equipped with sirens which are used to inform the motorist that he is to stop.

It is the wish of the Maine State Police that you have a happy and worthwhile vacation in Maine.

LAURENCE C. UPTON, Chief
Maine State Police
